

APPLICATION FOR ASSIGNMENT OF NON-COMMERCIAL PERMIT

Dear Smith Mountain and Leesville Lake Property Owners:

As licensee for the Smith Mountain Pumped Storage Project (Project), Appalachian Power Company (Appalachian) has the responsibility and authority to regulate, permit, and monitor uses within the Project boundary (800-foot elevation contour at Smith Mountain Lake; 620-foot elevation contour at Leesville Lake.)

In order to be considered valid, a permit for **Non-Commercial Boat Dock/Pier/Landing** must be assigned to any new property owner(s) upon the sale or transfer of property ownership. In doing so, Appalachian essentially creates a new permit, known as an Occupancy and Use Permit. Instructions for completing this application include the following:

1. Read the entire application carefully.
2. To help ensure a prompt response, please include all requested information. Incomplete applications will be returned for additional information.
3. The Smith Mountain Pumped Storage Project updated Shoreline Management Plan (SMP) and the Federal Energy Regulatory Commission's Order Modifying and Approving Updated SMP issued February 18, 2025, can be found at www.smithmountainproject.com.
4. A **survey**, depicting existing conditions within the Project boundary, is required. **This survey must be prepared by a licensed surveyor**, and must include all of the information detailed in the Application for Assignment.
5. Elevation drawings are required, showing at least two adjacent sides of the structure, and documenting the structure's height as measured from the lake's base elevation.
6. The deeded property owner(s) (to whom the Permit is being assigned) must sign the attached Occupancy and Use Permit as the "Grantee."
7. The Grantee's signature(s) must be notarized.
8. Information pertaining to the deed book or document number can be obtained by contacting the appropriate county. Online information is available at www.bedfordcountyva.gov, www.franklincountyva.gov, www.pittsylvaniacountyva.gov, or www.campbellcountyva.gov.
9. Enclose a check made payable to one of the following Clerks of Court in the amount shown below depending upon the county in which the property is located.
 - a. Clerk of the Circuit Court of Bedford County \$48.00
 - b. Clerk of the Circuit Court of Franklin County \$43.00
 - c. Clerk of the Circuit Court of Campbell County \$43.00
 - d. Clerk of the Circuit Court of Pittsylvania County \$48.00

10. Mail the completed application and the signed and notarized permit to the following address for processing:

Appalachian Power Company
Shoreline Management
P.O. Box 2021
Roanoke, VA 24022-2121

Should you have any additional questions, you may contact Appalachian's Shoreline Management staff at 540-985-2579 or shorelinemanagement@aep.com.

Sincerely,

Appalachian Power Company

**Application for Assignment of

hereinafter referred to as **PERMITTEE OR GRANTEE**, makes this **Application for a Use and Occupancy Permit ("Permit")** to **APPALACHIAN POWER COMPANY**, a Virginia corporation, hereinafter referred to as **Appalachian**.

WITNESSETH

THAT, WHEREAS, Appalachian has the authority and responsibility under its Federal Energy Regulatory Commission (FERC) license ("License") and its land rights to review and authorize certain activities within the Smith Mountain Project, the boundary of which includes all land within the 800-foot elevation contour at Smith Mountain Lake and the 620-foot elevation contour at Leesville Lake (the "Project"); and

WHEREAS, Permittee submits herewith its application for a Permit in accordance with the following described request:

PERMITTEE CONTACT INFORMATION

Permittee's Name(s): _____ and _____
Mailing Address: _____
(Street) (City) (State) (Zip)
Telephone: _____
(Mobile/home) (e-mail)

PROPERTY INFORMATION

Permit Activity Location: _____
(Lake) (County)

(Tax Map/ Parcel ID Number) (Legal Description)
Permit Activity
Lake Address (the "Site"): _____
(street) (city) (state) (zip)
Deed Book and Page No. or Document/Instrument No.: _____

NOTE 1: Attach copy of Permit for Non-Commercial Boat/Pier/Landing:

NOTE 2: Attach a survey, prepared by a licensed surveyor, including the following information (see Sample Exhibit A):

SURVEY REQUIREMENTS

- ☐ **Location and dimensions (length, width, height and roof overhangs) of the proposed structure**
- ☐ **Total Square Footage: _____ (including any roof overhang)**
- ☐ **Location of the Project boundary (800' contour at Smith Mtn., 620' contour at Leesville)**
- ☐ **Location of the base elevation (795' contour at Smith Mtn., 600' contour at Leesville)**
- ☐ **Total length of the structure (measured from the base elevation at the center of the walkway to the furthest point, including roof overhangs)**
- ☐ **Total length of shoreline as measured at the base elevation. (If the lot is less than 100' then documentation must be provided documenting that the lot was created prior to September 2, 2003.)**
- ☐ **All property lines and dock delineation lines**
- ☐ **Distances from the proposed structure to extended property lines/dock delineation lines**
- ☐ **Size and location of enclosed area (include interior dimensions)**
- ☐ **Number of slips: _____ (If any slip is greater than 26 feet in length, an oversized boat slip acknowledgement form is required.)**
- ☐ **Location of and distance to closest lateral mark(s)**
- ☐ **Location and dimensions of any existing structures to be retained within the Project boundary**
- ☐ **Location of and distance to adjacent structures from the closest point of the structure**
- ☐ **Elevation drawings of the structure which show the height from the base elevation to the highest point of the structure (roof peak or top of railings)**
- ☐ **Distance across the cove, as measured to the closest point on the shoreline (if less than 300', one third of the cove methodology is required): _____**
- ☐ **Subdivision plat on record with County Circuit Court showing location of the lot/structure. Online GIS maps printed from county tax maps do not meet this requirement. (Please note that this information can be inset into Exhibit A or can be submitted as a separate sheet.)**

The Permittee acknowledges and accepts the Terms and Conditions of Permit for Occupancy and Use as set forth in Exhibit "B" and further acknowledges the following:

Appalachian, pursuant to its License, has the continuing responsibility to supervise and control the uses and occupancies for which it has granted permission and to monitor the use of and ensure compliance with the conditions under which this Permit has been granted. As a result, the use and occupancy hereby permitted is deemed to be made under a revocable license from Appalachian. As such, if the use and occupancy violates any condition of the License or any other condition imposed for the protection and enhancement of the Project's scenic, recreational or other environmental values, or upon the petition of any other permitting agency, Appalachian shall take such lawful action necessary to address the situation. Such action may include, if necessary, the cancellation of this Permit and the removal of the non-complying structures and facilities. Furthermore, any structures or other use associated with this Use and Occupancy Permit must be maintained in good repair and comply with applicable federal, state and local requirements.

In addition, the water levels at Smith Mountain Lake can rise up to and occasionally exceed the 800-foot contour during periods of high inflow and fall as low as 787 feet and occasionally lower during periods of low inflow, maintenance or drought. Historically, water levels measured at the dam reached 799.79 feet in 1978 and 787.6 feet in 1970. Leesville Lake can fluctuate between 613 feet and 600 feet during normal operations as measured at the dam. The project boundary at Leesville is to elevation 620 feet, because the water level has

the potential for increasing upstream depending upon flows from Smith Mountain. Water levels can occasionally exceed or fall lower than these elevations due to floods, droughts, or maintenance. These elevations should be taken into consideration when designing structures.

The Grantee acknowledges that any Permit granted shall be limited to Appalachian's authority under its License and to its land rights to the property within the Project.

Mail this completed Application with Exhibits "A" & "B", and the permit signed by you to the following address:

Appalachian Power Company
Shoreline Management
P.O. Box 2021
Roanoke, VA 24022-2121

I/We certify that the above information is true and correct, and that I/we have read and agree to the Terms and Conditions of the Permit as set forth on Exhibit "B."

Low Density Use Boat Dock/Pier Smith Mountain and Leesville Lakes

TERMS AND CONDITIONS OF PERMIT FOR BOAT DOCK / PIER ("Permitted Facility")

This Permit is granted by Appalachian and accepted by the Grantee, subject to the following terms and conditions:

1. Grantee is the property owner or has the legal rights necessary to obtain this Permit.
2. This Permit is granted solely for the purpose described by the applicant in this Permit. No addition or design change shall be made to this Permitted Facility without prior approval from Appalachian.
3. Copies of the approved county permits must be forwarded to Appalachian for the Appalachian permit to be valid.
4. Construction shall be completed within one (1) year of the Permit issuance date.
5. All shoreline distances are measured from the 795-foot contour National Geodetic Vertical Datum of 1929 (NGVD) at Smith Mountain Lake and the 613-foot contour NGVD at Leesville Lake. Verifying the location of these elevations and all appropriate distances is the responsibility of the Grantee.
6. The Permitted Facility shall not be used for human or animal habitation.
7. The Permitted Facility shall not contain permanent or temporary sanitation facilities.
8. Floating facilities shall be securely anchored.
9. No attempt shall be made by the Grantee to forbid the full and free use by the public of all waters within the Project boundary, at or adjacent to the Permitted Facility or to unreasonably interfere with that full and free use in connection with the ownership, construction, operation or maintenance of the Permitted Facility.
10. a) Appalachian may revoke this Permit whenever it determines that the public interest necessitates such revocation. The revocation notice shall be by thirty (30) days' notice, mailed to the Grantee by registered or certified letter, and shall specify the reason for such action.

b) Appalachian may revoke this Permit whenever it determines that the Grantee has failed to comply with the conditions of this Permit. The revocation notice shall be by thirty (30) days' notice, mailed to the Grantee by registered or certified letter, and shall specify the reason for such action. The Permit will not be terminated if Grantee is diligently working to cure such violation within a reasonable period after such notice.

11. The Grantee is responsible for proper design, engineering, construction, maintenance and placement of the Permitted Facility. Appalachian's review and approval of the plans are no guarantee or assurance the Grantee's plans are proper or adequate for the purpose intended.
12. It is understood and agreed by and between Appalachian and Grantee that part of the consideration for the granting of this Permit for shoreline use is the Grantee's agreement to keep Project lands and waters occupied by and surrounding the Permitted Facility free of all waste, garbage, and other unsightly debris and materials and is to comply with local health rules and regulations.
13. This Permit is granted to Grantee as a personal right and the parties agree that nothing herein shall be construed to create any easement or other property interest in Grantee. This Permit may be assigned to (i) a successor who shall purchase, inherit or otherwise acquire the land that is benefitted by this Permit or (ii) to a property or unit owners association which shall be responsible for the maintenance of the boat slips permitted hereby and the land which is benefitted by this Permit or (iii) to a bank or other licensed lending institution which shall provide a loan on the land that is benefitted by this Permit or for the construction of the boat slips which are permitted hereby. In order to be effective, any assignment shall provide for the assignee's agreement in writing to comply with the terms of this Permit and Appalachian must give its written consent to such assignment, which consent shall not be unreasonably withheld. Any other attempted assignment or transfer shall render this Permit null and void.
14. In the event that any previously known or unknown cultural resource materials are discovered, all work associated with this permit must be stopped. Appalachian must be notified and consultation with the State Historic Preservation Office (SHPO) must be completed before any further work within the work area will be allowed to continue. In addition:

A. The Grantee shall notify Appalachian and SHPO immediately and follow-up with a written account of the discovery. The Grantee may be required to employ an archaeologist who meets or exceeds the qualifications described in the Secretary of the Interior's Professional Qualifications Standards (48 FR 44738-9) to assess the eligibility of the resource for inclusion in the National Register.

B. If the resource is determined to be eligible for inclusion in the National Register, and the applicant wishes to continue with the activity, the Grantee shall ensure that an archaeologist who meets or exceeds the qualifications described in the Secretary of the Interior's Professional Qualifications Standards (48 FR 44738-9) shall prepare a plan for its avoidance, protection, or recovery of information. The SHPO shall approve such plan, prior to implementation.

C. Work in the affected area shall not proceed until either:

a. Appropriate data recovery or other approved mitigation procedures are developed and implemented, or

b. The determination is made that the located resources are not eligible for inclusion on the National Register.

15. Any other associated work within the project boundary shall be done in accordance with the Shoreline Management Plan for the Smith Mountain Pumped Storage Project as approved by FERC Order Modifying and Approving Updated Shoreline Management Plan issued February 18, 2025, and all associated amendment, addendum and revision thereto in effect as of the date of this Permit.
16. The Permitted Facility shall be constructed, maintained, and operated in accordance with plans heretofore submitted to and approved by Appalachian. No modifications to the Permitted Facility, or additions thereto, or use thereof, shall be made without first securing the approval of Appalachian.
17. This Permit is granted at the sole risk of Grantee, their employees, agents, contractors, subcontractors and designees and Grantee agrees to indemnify, hold harmless, and defend Appalachian, and its agents, employees, officers, directors and contractors to the extent permitted by law, against all costs, expenses, suits, actions, and claims arising out of injuries to persons (including death) or damage to property, caused by Grantee, their employees, agents, contractors, subcontractors or designees attributable to the performance of work on the above described Site, the presence or use of the Permitted Facility by Grantee, their employees, agents, contractors, subcontractors, or designees, excepting any liability arising from Appalachian's sole negligence, or that portion of any liability attributable to Appalachian's contributing or concurrent negligence.
18. This Permit is granted subject to all of the terms and conditions of Appalachian's License for the Smith Mountain Combination Project FERC No. 2210, and any amendments or renewals thereof, and any orders granted by Federal Energy Regulatory Commission pursuant to the provisions of the License; to all prior easements, rights-of-way, covenants, conditions, and servitudes whether or not of record affecting title to the Site, and to such state of facts as an accurate survey or examination of the Site may reveal.

19. Grantee shall at their expense keep and maintain the Site and the Permitted Facility thereon and appurtenances thereof in good repair and in safe and sanitary condition, ordinary wear and tear excepted. Grantee shall conform with and do all things necessary to comply with every applicable state, federal, or local governmental statute, law, regulation, order, or requirement relating to the Permitted Facility. Grantee shall take appropriate action to guard and warn against dangerous conditions, uses, structures, or activities on the Site. At the expiration or earlier termination of this Permit, Grantee shall return the Site to Appalachian in substantially the same condition as when Grantee's occupancy commenced, ordinary wear and tear excepted unless otherwise directed. Throughout the term of this Permit, Appalachian shall have the right at all reasonable times to enter the Site for the purpose of inspecting same.
20. Grantee shall keep and maintain the Site and the Permitted Facility thereon and appurtenances thereof free of any unapproved regulatory markers and any non-regulatory markers or buoys.
21. Grantee agrees that they will assert no interest contrary to that held by Appalachian with respect to the Site, and that their status hereunder shall be deemed to be that of a licensee.
22. Grantee shall make any person using the Permitted Facility aware of these conditions and ensure their compliance therewith.
23. Grantee agrees to all conditions set forth in the Smith Mountain Pumped Storage Project Shoreline Management Plan as approved by FERC Order Modifying and Approving Updated Shoreline Management Plan issued on February 18, 2025, and all associated amendment, addendum and revision thereto in effect as of the date of this Permit.
24. Where applicable, the terms of the **FLOWAGE RIGHT AND EASEMENT DEED SMITH MOUNTAIN COMBINATION HYDRO ELECTRIC PROJECT UPPER AND LOWER RESERVOIRS** (the "Easement") that apply to the Permitted Facility are incorporated herein by reference. The terms and provisions of the Easement shall control wherever the same may be in conflict with this Permit.

**ADDITIONAL TERMS AND CONDITIONS FOR EXISTING NON-
CONFORMING AND LEGACY PROGRAM DOCKS**

25. Any structures other than docks or piers which are located within the 800 foot contour elevation at Smith Mountain Lake or the 620 foot contour elevation at Leesville Lake (Project boundary) shall not be replaced. Docks or piers located within the Project boundary may only be replaced under certain circumstances (see Section 2.7 a. of the SMP).
26. Walkways which are located between the base elevation and the Project boundary, that exceed the width requirements of the Shoreline Management Plan shall not be replaced.

27. Enclosures exceeding the size or location specifications set forth in the Shoreline Management Plan shall not be rebuilt.
28. Any future replacement dock or pier will be placed within the buildable area to the greatest extent possible considering setbacks to dock delineation lines and the application of one third of the cove methodology.
29. If the structure is located adjacent to shoreline classified as a Resource Protection Area, then any future replacement structure shall maintain, to the greatest extent possible, a setback of at least thirty (30) feet from the Resource Protection Area.
30. Any replacement structure shall not include habitation or sanitation facilities.
